

HUSSEN SAMI GHABAYEN

Flutter Developer | Mobile Application Engineer

Gaza, Palestine | (+972) 59-219-7258 | ghabayenhussej@gmail.com

[LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Innovative and results-driven Flutter Developer with over 3 years of hands-on experience building high-performance, scalable mobile applications. Proven expertise in Clean Architecture, advanced state management (BLoC/Cubit, GetX, Provider), real-time communication systems (LiveKit, Socket.IO), and Firebase ecosystem integration. Successfully delivered production applications serving 16,000+ concurrent users with 10,000+ combined downloads. Demonstrated leadership through mentoring junior developers, establishing code review processes, and contributing to open-source projects. Committed to social impact through humanitarian technology initiatives and data volunteering during crisis periods.

EDUCATION

Bachelor of Information Technology Sep 2020 - Jun 2024

Islamic University of Gaza | Gaza, Palestine

GPA: 89.39 / 100 (Excellent)

Relevant Coursework: Advanced Software Engineering, Mobile Application Development, Database Management Systems, Web Technologies, Object-Oriented Programming

High School Diploma Jan 2019 - Jun 2020

Abu Obeida High School | Gaza, Palestine

TECHNICAL SKILLS

Mobile Development	Flutter/Dart (Advanced), Native Integration, Platform Channels, UI/UX Implementation
State Management	BLoC/Cubit, GetX, Provider, Riverpod
Architecture	Clean Architecture, MVVM, Repository Pattern, SOLID Principles, Feature-First Modular Structure
Real-Time Systems	LiveKit (Voice/Video Chat), Socket.IO, WebSocket, Firebase Realtime Database
Backend & Cloud	Firebase (Auth, Firestore, Storage, FCM, Realtime DB), RESTful APIs, NestJS
Databases	SQLite/SQFLite, Hive, Firestore, Shared Preferences
DevOps & Tools	Git/GitHub, CI/CD Pipelines, Google Play Console, App Store Connect, Agile Methodologies
Additional	Java/JavaFX, PHP, HTML/CSS/JavaScript, Google Maps Platform

PROFESSIONAL EXPERIENCE

Mobile Application Developer Jan 2023 - Jul 2023

Developer Plus Company | Gaza, Palestine

- Architected and implemented 4+ commercial Flutter applications achieving 10,000+ combined downloads
- Reduced app launch time by 40% through optimized state management implementation using GetX and BLoC
- Mentored 3 junior developers in Flutter best practices, clean architecture, and code quality standards
- Established code review processes that improved overall code quality by 60%
- Integrated Firebase services including real-time database, push notifications, and cloud authentication
- Developed offline-first architecture using SQLite and Hive, and created reusable widget libraries reducing development time by 30%

Data Entry Volunteer Jul 2023 - Sep 2024

International Medical Corps (IMC) | Gaza, Palestine

- Volunteered during the humanitarian crisis period, managing critical medical and aid distribution data
- Processed and organized large volumes of sensitive data while maintaining strict confidentiality and security protocols
- Collaborated with international team members ensuring accurate and timely data entry under challenging conditions
- Developed efficient data entry workflows that improved processing speed and data quality

Open-Source Contributor Jun 2023 - Aug 2023

Bond Framework (Flutter) | Remote

- Contributed to the core library of the Bond Framework for Flutter ecosystem
- Improved state management, authentication, and theming components for the open-source community

Problem-Solving Participant Oct 2024

Palestinian Collegiate Programming Contest (PCPC) | Palestine

- Participated in competitive programming contest demonstrating strong analytical and algorithmic skills under pressure

KEY PROJECTS

BALONIA - Social Live Streaming & Real-Time Communication Platform

Production | 16,000+ Concurrent Users | Android & iOS

- Built a comprehensive social platform with live group voice chat rooms using LiveKit SDK supporting multiple simultaneous participants
- Implemented real-time messaging via Socket.IO with WebSocket support, virtual economy with coin transfers, and social gifting system
- Designed role-based access control (User, Admin, Agent), gamification features (fortune wheel, engagement mechanics), and commerce integration
- Architected using Clean Architecture with BLoC/Cubit, NestJS backend (V16), Firebase services (Auth, Firestore, FCM), and Hive caching
- Built Arabic-first responsive UI with RTL support, separate dev/production environments, and comprehensive CI/CD pipeline

E-SHABNI (PULL ME) - Ride-Hailing & Transport Platform

Production | Iraqi Market | Android & iOS

- Developed a full-featured ride-hailing platform connecting passengers with drivers for light and heavy transport services
- Implemented smart driver matching using Haversine distance formula (80km radius) with multi-criteria filtering and fallback mechanisms
- Built real-time location tracking via Firebase Realtime Database, Google Maps integration, and WhatsApp OTP authentication
- Designed digital wallet system, admin dashboard with analytics, and split Cubit architecture for single-responsibility state management
- Optimized for Arabic RTL with responsive design, offline-first caching, and graceful degradation for poor network conditions

MISTERCAR - Car Services Management Platform

Production-Ready | Saudi Arabian Market | 15,000+ Lines of Code

- Built a subscription-based car maintenance platform with multi-tier license packages and Telr payment gateway integration
- Implemented Firebase Auth with Google Sign-In, FCM notifications, Google Maps for location services, and full i18n (Arabic/English)
- Designed advanced payment flows with WebView-based secure transactions, deep link callbacks, and dark/light theme support

ACADEMEX - Student Community & Academic Support Application

- Developed a comprehensive academic social platform with community feeds, resource sharing, and AI chatbot assistant (EDI)
- Built a digital library with search, filtering, and rating system for academic resources categorized by subject and year

HEALTHCARE MANAGEMENT SYSTEM - Crisis-Period Medical Platform

- Developed during the crisis to support healthcare delivery: patient management, doctor portal, admin dashboard, and appointment scheduling
- Built real-time analytics, clinic performance monitoring, and resource utilization reporting

ADDITIONAL PROJECTS: Sapakem (vendor-centric e-commerce marketplace with SMS notifications), Mashgli (salon management system), Free Market (online shopping platform)

CERTIFICATIONS

- Professional Flutter Development (Udemy)
- Advanced Java Programming (Udemy)
- Web Development Fundamentals (Udemy)

LANGUAGES

- **Arabic:** Native proficiency
- **English:** Professional working proficiency (University education conducted entirely in English)

LEADERSHIP & SOFT SKILLS

Technical Leadership & Team Management, Cross-functional Collaboration, Mentoring & Code Review, Project Planning & Execution, Client Communication & Requirements Gathering, Problem-Solving & Analytical Thinking, Public Speaking, Conflict Management, Agile Methodologies
